Traveling

📁 EMPLOYMENT HISTORY

Python Django Developer at Acquaint Softtech Private Limited, Ahmedabad
October 2021 — October 2022

PROJECTS :

• Real-Schools (in-development)

Real School is a platform that connects aspiring adult learners with real-world leaders, professionals, managers, entrepreneurs, and experts who have real-life business lessons to teach. Practical nuggets of wisdom. The stuff that really matters. Real School works very simply: Come here to learn, or come here to teach.

• Asaf rental management system

Rental management system is If a driver decides to rent a car beforehand, they go to a car rental website or app and find a vehicle that meets their needs. Then, they book it and pay for the chosen rental period, if upfront payment is required. On the appointed day, this customer arrives at the car rental location to pick up the chosen car.

Junior Python Developer at Dynamic Methods Solution, Ahmedabad
January 2021 — October 2021

PROJECTS :

• Delivery App

<https://documenter.getpostman.com/view/15280184/TzY4gv98>

An online medicine delivery app enables customers to order doorstep delivery of pharmacy products. A delivery app is a game changer in the pharmacy industry. Customers can use a pharmacy app to browse many categories of medications. Once they find what they need, they can add it to the cart and proceed to checkout.
